

# COVID-19

## PHARMACY CLEANING GUIDELINES

### APPROPRIATE CLEANERS & DISINFECTANTS

Use products with a DRUG INFORMATION NUMBER (DIN) & labeled as a broad-spectrum virucide.

#### EFFECTIVE AGENTS AGAINST COVID-19:

- > 70% ethyl or isopropyl alcohol
- > A mixture of 1-part household bleach to 9-parts water
- > Accelerated hydrogen peroxide 0.5% (Virox ®)

#### CLEAN GENERAL AREAS OFTEN—MINIMUM TWICE DAILY

Desks, counters, swinging doors leading to the dispensary, door/drawer knobs, tables, seating areas

#### FREQUENTLY TOUCHED SURFACES

Clean every 30-60 minutes & immediately after interaction if a patient screens positive for COVID-19: telephones, pill counting machines, faucets, debit machine keypads, cash registers, pens, patient buzzers, keyboards

Nova Scotia  
College of  
Pharmacists

#### TIPS!

- > set timers & alarms as reminders to clean
- > Use disposable gloves when cleaning, then discard & wash hands with soap & water for 20 secs

# CLEAN MORE OFTEN
