Re: Clinical Practice Consultant Service

As the NSCP works with its health system partners to implement care delivery solutions during COVID-19, now more than ever you are being asked to make full use of your prescribing authority to resolve your patient's drug-related needs. We recognize that this has been challenging, and that some pharmacists may find it helpful to consult with someone when a clinical situation creates uncertainty.

The NSCP is pleased to let you now that a **new service is now available to support you in your clinical decision-making** when prescribing for renewals, therapeutic substitution, and adaptations. Please see the [brochure](#) for more information about how to register for and access this clinical practice consultant service,

(Note: please continue to contact the NSCP directly for all regulatory questions related to Standards of Practice)

Thank you for continuing to bring your best in meeting the needs of your patients during the COVID-19 pandemic,

Sincerely
Beverley Zwicker
