Re: Guidance for Staff Who Test Positive for COVID-19 and Close Contacts

The NSCP has worked closely with NS Public Health to create a guidance document that supports pharmacies in understanding what will happen should a pharmacy staff member require COVID-19 screening, test positive and/or be identified as a close contact. This information will assist pharmacies in planning. The [Guidance for Pharmacies When a Pharmacy Staff Member is COVID-19 Positive or a Close Contact](#) document is posted on the NSCP website.

The document is based on current information from Public Health. In instances when Public Health direction differs from what is provided in this guidance document, pharmacies must comply with Public Health direction.

The NSCP will update this document should amended direction from Public Health be received.
